Through this project, students will be able to:

- learn more about the use of mathematics in the daily newspaper.
- change degree Celsius to degree Fahrenheit.
- apply the concept of data interpretation to create a headline.
- apply their creativity and imagination to complete the art work.
- develop critical thinking and problem-solving skills.
- Enhance their vocabulary and mathematical knowledge about the great mathematicians.
- appreciate the use of mathematics in our daily lives.

Numbers of every kind may appear in every edition of your newspaper. Numbers are used to quote prices in ads, to provide page references, to give addresses and telephone contacts, to give directions in recipes, etc. Our world depends on numbers for communication.

Mathematics is used in newspapers in many ways, including:

- Numbers in ads: Newspapers use numbers to quote prices in advertisements.
- Page references: Newspapers use numbers to provide page references.
- Addresses and phone numbers: Newspapers use numbers to provide addresses and phone numbers.
- Discounts: Newspapers use prices and discounts to help readers figure out the percentage off.
- Taxes: Newspapers use GST and other taxes to help readers calculate the total cost of items.
- Promotions: Newspapers use promotions like "buy two and get one free" to help readers understand if they are buying more than they need.
- Image and ad size calculations: Newspaper designers use math to calculate the size of images and ads that will best fit on the page.

VIDYA

Let us design our own Mathematics Newspaper and appreciate the use of mathematics in our daily lives including the daily newspaper!!

- Take a chart paper and use it as the base of your newspaper.
 - Think of an innovative name for your mathematics newspaper.
 - Divide the newspaper into 7 different sections as mentioned in the given later part of the project.
-

Section 1 – MATHEMATICS IN NEWSPAPER

Write five areas where mathematics is being used in any newspaper. Stick appropriate cutouts for the same.

Section 2 – Creating a Maths HEADLINE

Real life data of number of students of LakshmiPat Singhania Academy having their birthdays on different months of the year will be given. Present that data in the form of a BAR GRAPH and create a headline for the same.

Data will be provided on the day of the project.

Section 3 – DISPLAY ADVERTISEMENT

Newspaper ads are a traditional marketing method that can be effective for businesses to reach a large audience. There are many types of advertisements that can appear in a newspaper.

You have been given the responsibility to get a **display ad** printed in the local newspaper on LakshmiPat Singhania Academy organizing Bagless Days with fun-filled activities!! Use minimum 4 shapes (plane or solid) in the display of your ad along with a catchy tag line. Also find the costing of your ad. Rate will be provided on the day of the project.

Section 4 – WEATHER REPORT

Newspapers use weather reports to inform readers about the weather conditions. Weather reports are important because they can help people plan their activities and make decisions, such as whether to bring an umbrella or what to wear.

The most common units of temperature used to measure weather are Celsius ($^{\circ}\text{C}$), Fahrenheit ($^{\circ}\text{F}$), and Kelvin (K):

- Celsius ($^{\circ}\text{C}$): Part of the metric system, the Celsius scale is commonly used.
- Fahrenheit ($^{\circ}\text{F}$): Invented by German-Dutch scientist Gabriel Fahrenheit (1686-1736).

In this section you will learn to convert °C to °F. To change °C to °F, use the formula as mentioned below:

$$^{\circ}\text{F} = ^{\circ}\text{C} \times 1.8 + 32$$

Weather report will be provided on the day of the project.

Section 5 - Select a famous mathematician of your choice. Paste his/ her photograph and write a few lines about him/ her along with some of the achievements.

Section 6 – Find out one new word related to mathematics. Display it this section with its meaning and usage in a sentence.

Section 7 – BRAIN BUSTERS –

Puzzles are a regular feature of any newspaper. Solve the given puzzle to show your mathematical skills. The puzzle will be given on the say of the project.

LEARNING OUTCOME:

At the end of the project, students should be able to make a bar graph, name the units of temperature, a famous mathematician, create an advertisement using mathematical shapes as well as enhance their vocabulary by using a mathematical term.

Newspapers are a source of current information and news. It acts as a platform for public debate and discussion. It provides entertainment, educational content and supports democracy by holding those in power accountable.

Here is what you will do in this Project, with the above information and a little research on your own:

Your school is holding a science exhibition next month. Class 5 has been given the responsibility for making various article of daily use like pen stand, chalk box, decorative bowls, etc. for the upcoming exhibition. These articles are to be made from old newspapers. The proceedings got from selling these items will be donated to the orphanage.

Q1. Divide your class into 6 groups **A, B, C, D, E and F**. Followings items are to be made using only **old newspapers**, cardboard, glue, scissors and stationery. Some links have been given for your reference. You can use your own creativity to improvise and design your own model.

Group A and B – Pencil stand

Group C and D – Waste basket (small size)

Group E and F – Decorative wall hanging

The links for making the model are given below:

Q3. Many health-related articles are published in newspaper. Find one such health article from any of the well-known newspaper. Cut it out and stick the same in the file

With a little research on your own **answer the following questions:** (You may do this on worksheet/ fabriano sheet. Also, provide a **cover page** for the same. Support your answers with **relevant pictures wherever necessary**)

Q4. Where and when was paper first invented?

Q5. Before the newspaper was invented, what were some of the other materials that were used in ancient India and abroad for broadcasting any news or information? Write the names of any four such materials. Support it with relevant pictures.

Q6. In the figure given below the process of making paper from wood pulp is shown.

a. Find out and write the names of any four trees that are used to make paper.

b. Name the main ingredients present in pulp that helps to make paper.
